PRECISION
13 14 16

Part of what makes the Precision 16 such an excellent one-design sailboat is our competition. They taught us a lot. We knew that we were looking for an exceptionally stable family-oriented boat that did not sacrifice modern state of the art performance. At the same time, it was clear that YOU wanted a sailboat that didn't require an olympic caliber sailor to make it perform at its best. The Precision 16 is the boat they helped us build.

The Precision 16's generous beam and low center of gravity make her a forgiving boat in the hands of a beginner. Her generous freeboard and side decks keep the crew on-board and dry. Eight feet of cockpit and a large sundeck provide arm and leg room for four adults. Positive flotation is built in and a self bailing cockpit gives still greater security. Don't let this tame exterior fool you, however, for the more experienced sailor, the Precision 16 is a real performer.

The main thing we learned from our competition, however, is the value of simplicity. We wanted to offer all the control lines the average sailor would want for good performance without trying to dazzle you with extra strings to pull. To you this means a boat that you can begin enjoying the first time you go out. It also means a boat you can race without needing hundreds of dollars worth of go fast goodies.

The Precision 16 stacks up to be an excellent choice for you whether you are a first timer, weekend competitor, or value conscious family.

STANDARD EQUIPMENT:

- HAND LAMINATED FIBERGLASS CONSTRUCTION • POSITIVE FOAM FLOATION • DACRON MAIN & JIB SAILS • DACRON YACHT BRAID SHEETS & HALYARDS • STAINLESS STEEL 1x19 STANDING RIGGING • HEADSTAY TURNBUCKLE • SHROUD ADJUSTERS • ANODIZED ALUMINUM MAST & BOOM • HINGED MAST STEP • TEAK WOOD TRIM • FIBERGLASS CENTER BOARD • MAHOGANY KICK UP RUDDER BLADE • BALL BEARING BLOCKS & SWIVEL MAINSHEET CAM CLEAT • JIB TRACK WITH CAM CLEATS • TWO STORAGE COMPARTMENTS • MOLDED IN NON-SKID

PRECISION 16

For exceptional responsiveness and sheer exhilaration a small lightweight sailboat is truly hard to beat. The Precision 14 was designed to offer you all of that and more.

It is an excellent first choice for the novice sailor. The basics become easy to understand because the boat tells you instantly when it needs attention. Her ample beam gives her the stability to make her a forgiving partner while you gain experience. If you really want her to go, however, hold on! The Precision 14 offers high spirited sailing performance whether you're headed across the pond or around the race course. It is because of this versatility that fleets of Precision 14s are growing rapidly around the country.

Like her sisters you won't find any skimping on quality here. Harken blocks, Samson Braid, Dwyer Spars, Elvstrom Designed bailers and more are the equipment you find on winners.

It really isn't hard to design and build a good boat. The Precision 14, however has provided it at a truly affordable price. Look around. We are confident that you too will find the Precision 14 offers more boat for the money and performance that is hard to match.

SAIL AREA, TOTAL — 129 SQ. FT.
MAINSAIL — 83 SQ. FT.
JIB — 49 SQ. FT.
WEIGHT — 250 LBS.
DESIGNER: STEVE SEATON

Aggressive spirited performance is not a characteristic that you would normally associate with an economical purchase price. That, however, is exactly what the Precision 13 was designed to deliver.

It combines a simple unstayed cat rig with a sleek modern hull shape. It is a simple fun boat whose light weight makes it easy to get on plane and yet stable and forgiving for the beginner. Don't let its good manners fool you, however. With an experienced skipper at the helm, she can perform with the best of them and give you the maximum amount of enjoyment for your dollar.

The Precision 13 can be cartopped or trailered to your favorite sailing spot and can be easily carried by two people.

The Precision 13 benefits from the production techniques we developed in building our larger boats. This means using careful engineering and design to save you money without cutting corners.

Look at the competition, look at the price. You may be surprised to find there is really no competition at all.

STANDARD EQUIPMENT:

- HAND LAMINATED FIBERGLASS CONSTRUCTION • POSITIVE FOAM FLOTTATION • DACRON SAIL • DACRON SHEETS • ANODIZED 2 PIECE MAST & BOOM • MAHOGANY DAGGER BOARD & KICK UP RUDDER BLADE • BALL BEARING BLOCKS • MAINSHEET CAM CLEATS • TEAK WOOD TRIM • MOLDED IN NON-SKID
